

# Ayman Bassam Ismail

Full Stack Developer (React & PHP Laravel)

Gaza, Palestine | Email: [ayman.ismail.dev@gmail.com](mailto:ayman.ismail.dev@gmail.com) | Phone: +972598895851

GitHub: <https://github.com/ReBestX> | LinkedIn: <https://www.linkedin.com/in/aymanbismail>

---

## PROFESSIONAL SUMMARY

---

A Full Stack Developer who possesses superb skills and knowledge in Laravel, PHP, React, Next.js, and API development. Deeply logical reasoning is the foundation of my developing web applications that can be easily scaled up with RESTful APIs and secured by authentication methods. I am a quick learner, a great problem solver and my main focus is on writing clean code, ensuring high performance and making the product user-friendly. I am eager to be a part of a startup, a software company, or an internship where I could contribute to the development of production systems and at the same time acquire technical knowledge.

## WORK EXPERIENCE

---

### Shifra Training and Development Center

Nov. 2025 – Present

Backend Developer Intern

*Remote*

- build backend services in PHP using Laravel, focusing on a clean MVC structure.
- create RESTful APIs and handle routing and middleware, along with well-organized error handling.
- handle MySQL database stuff like setting up the schema, writing good queries, and managing migrations with seeders.
- also set up login and access control, including user roles and security stuff.
- create API docs and work with frontend devs to make sure everything works together. Plus, I handle the visuals and manage branches and pull requests with Git and GitHub.
- My tech stack includes PHP, Laravel, MySQL, REST APIs, MVC, and authentication.

### Gaza Sky Geeks

Jun. 2025 – Present

Junior Frontend Developer

*Remote*

- develop responsive UI components using React.js and JavaScript.
- work with RESTful APIs and manage state using Redux and Zustand.
- debug and improve frontend performance across different browsers.
- I take part in code reviews, pair programming, and team problem-solving.
- practice clean code and design component architectures for reuse.

### Gaza Sky Geeks

Apr. 2025 – Aug. 2025

Trainee – Programming & Algorithms

*Remote*

- Solid grasp of algorithms, data structures, logic programming, and how computers think.
- Created pseudocode and flowcharts, and improved solutions for problems involving algorithms.
- Practiced fixing bugs and solving problems methodically.
- I have complete control over being able to write tidy code and in-depth thinking.
- Skills: Writing algorithms, Level of know-how on problem solving, A good, clear sense of how to go from logical thinking to actual code, debugging, Mostly the expertise in code enhancement.

### Oyoun Media

Jun. 2023 – Oct. 2023

Backend Developer Intern

*Remote*

- Practical development experience gained in working with Laravel, PHP, MySQL, and APIs.
- Made contributions in developing and sustaining backend functionality in a production environment.
- Resolved bugs, enhanced functionality in current features, and integrated internal APIs.
- Used GitHub for version control.
- Stack: PHP, Laravel, MySQL, API Integration.

## PROJECTS

---

- **Select AI – Next.js Platform (Work in Progress)**

A web application for discovering AI tools and their use cases.

GitHub: <https://github.com/ReBestX/SelectAi>

**Current Features:**

- Next.js 15 + React 19 architecture with server components.
- Smart search interface for AI tools.
- Fully responsive UI using modern frontend patterns.

**Planned Features:**

- Admin dashboard with role-based access.
- Laravel backend for authentication and data storage.
- API integration to fetch and categorize AI tools.
- Documentation pages for each AI tool.

**Tech Stack:** Next.js, React, TypeScript, Tailwind CSS, Prisma, Zustand.

- **Nexus – Social Media Platform**

A full social platform built with custom authentication, user profiles, admin controls, and CRUD operations.

GitHub: <https://github.com/ReBestX/Nexus>

**Core Implementations**

- Implemented secure login, registration, and session management.
- Designed MySQL database schema and optimized queries.
- Built all UI screens using HTML, Tailwind CSS, and JavaScript.
- Developed backend logic with PHP, Laravel-style architecture, and AJAX requests.

**Tech Stack:** PHP, MySQL, AJAX, Tailwind, JavaScript.

- **Java OOP Platform – Desktop Application**

GitHub: <https://github.com/ReBestX/Java-2-Project>

A console-based store management system built with Java and OOP principles.

**Key Implementations:**

- Developed customer, item, and shopping cart modules using modular class design.
- Implemented input validation, exception handling, and menu-driven workflows.
- Applied core OOP concepts including abstraction, encapsulation, and constructors.

**Tech Stack:** Java, OOP, Data Structures, Console UI.

## VOLUNTEERING EXPERIENCE

---

**Content Creator**

**Apr 2025 – Present**

TechAura (AI & Coding)

*Remote*

- Co-founded a technical education initiative focused on AI tools, programming, and software skills.
- Produced and shared structured, high-value educational content to support learners in tech fields.
- Contributed to building an online community centered around coding, artificial intelligence, and digital tools.

**Instructor**

**2020**

Al Taqwa High School (Science & Technology Department)

*Gaza, Palestine*

- Conducted training sessions on Visual Basic, PHP, SQL, and Advanced JavaScript.
- Led students through practical exercises and actual programming problems.
- Improved skills in leadership, communication, and group management through coordinating and engaging students in discussion.

## EDUCATION

---

**B.Sc. in Software Engineering**

**2021 - 2026**

University of Palestine

PS-Gaza

- **GPA: 3.5/4.0 (approximately)**

## High School Diploma – Scientific Stream

Altaqwa Secondary Boys School

2021  
PS-Gaza

- **High School Average: 92.7%**

### CERTIFICATIONS

---

- **Fundamentals and Data Structures and Algorithms** – [Gaza Sky Geeks](#), Issued Aug 2025
- **The Ultimate React Course 2025: React, Next.js, Redux & More** – [Udemy](#), Issued Jul 2025
- **PHP for Beginners - Become a PHP Master - CMS Project** – [Udemy](#), Issued Jul 2023
- **Git and GitHub** – [Almdrasa](#), Issued May 2023

### SKILLS

---

- **Frontend:** React.js, Next.js, JavaScript, TypeScript, Tailwind CSS, Bootstrap, Redux, Zustand, Responsive Design.
- **Backend Development:** PHP, Laravel, Node.js, RESTful API Development, Authentication & Authorization, MVC Architecture, Middleware, Error Handling.
- **Databases & Tools:** MySQL, Prisma, Supabase, PhpMyAdmin, Git, GitHub, API Documentation.
- **Software Development:** OOP, Clean Code Practices, Debugging & Optimization, Algorithmic Thinking, Version Control.
- **Languages:** Arabic (Native proficiency), English (Full professional proficiency)

### SOFT SKILLS

---

Problem Solving, Analytical Thinking, Communication, Teamwork, Time Management, Research Skills, Remote Collaboration, Leadership Potential.
